

DORMA Product Handbook

Dynamic Glass Components

Your Specialist Architectural Supply Chain Partner

With a strong background in the construction industry, Bellsure began its journey as an architectural ironmongery expert. You'll find the same today, only our products and services have expanded to meet the needs of our diverse client base, including main contractors, office fit-out companies and retail shopfront specialists.

We have a very practical, straight-forward and customer-focused approach, working with a range of people on each project, from architects and designers to commercial and site teams.

Supporting you from concept to completion

Advise

We pride ourselves on having the in-depth knowledge you need. Our customers come back to us time and again because they trust the advice we give. Bellsure are already a trusted adviser and an established supplier to thousands of contractors.

Inform

Access our specialist technical skills and supply chain in a range of architectural hardware fields. We have specialists in doorset scheduling, automatic doors, architectural ironmongery, glass partitioning and shop facades, glass balustrades, street furniture, cycle storage and car parking solutions.

Design

We work closely with our customers to make sure that your design is the best that it can be - fantastic looks, compliance, functionality and space saving are all considerations that we discuss with you during the planning and design process. For architects and contractors, we supply free CAD drawings as part of our friendly, efficient service. We work closely with our customers to ensure that your design is the best that it can be. Glass cut outs are also available to download on our website, bellsure.co.uk

Slide Over Strike Box

10mm glass Ref: 05.112
12mm glass Ref: 05.132

£41.00

- For slide over corner lock for single door

A Case Study

Subsea 7, Planet Partitioning

The Project

In Sutton City Centre, a revolutionary Head Office has been built showcasing a host of useful and engaging areas to serve visitors and staff. The Subsea 7 building resembles an underwater wonderland featuring interior colour schemes that replicate the different depths of the sea.

The design features structural supports created from underwater piping in their natural/coated state and different oceanic landscapes are incorporated into the layout with the use of exposed steel and concrete.

Meeting rooms, break out hubs and catering areas have been strategically positioned to increase employee engagement and interaction. Everything has been thought of, from bees on the roof to a multi-functional top of the range gym - the attention to detail is incredible. Planet Partitioning took on the 160 door project and fitted a range of door systems, glazed partitioning and balustrade creating a truly unique experience for everybody that enters the building.

The space creates a unique environment where everybody can see each other and communicate...the design and fit-out is perfect...we couldn't be happier

Georgina Molinaro, Subsea 7

The Solution

Our Vista team acted as an extension of Planet Partitioning, providing customer service and support in the procurement and delivery of items needed on this project.

A selection of Primeline offset fittings, drop seals, Dormakaba floor springs, bespoke pull handles and floor stops were selected for the project. Taking into account the premium finish required as an end result, products from our Primeline range were the obvious fit. Our durable and innovative range will stand the test of time for both aesthetic and functional purposes.

For any advice on entrance and shop fittings, glazed partition fittings and balustrade systems, please email vistateam@bellsure.co.uk

- Call our team on **01730 719 292** today for more information about our ranges.

Offset Top Centres

Note: If corner fittings/door rails are combined with frame top centres, please indicate rebate depth with order

NB: All dimensions are in mm unless otherwise stated.

£23.00

Pivot

3mm Ref: PT24

- 15mm Ø with fixing plate

£12.00

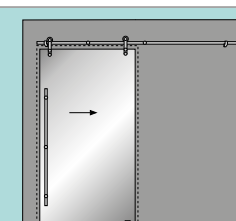

NB: All dimensions are in mm unless otherwise stated.

Compact Sliding Door Systems

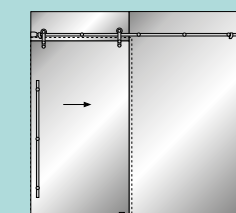

Manet Compact

The aesthetic elegance of the **Manet Compact** concept is also available in the form of standardised sets for simple, fast planning of the more popular system types with 8, 10 or 12mm toughened safety glass (TSG). Optional accessories enable the individual sets to be semi-customised.

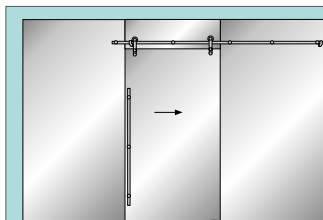

The system components offer numerous adjustment possibilities in order to ensure problem-free installation of whichever door type. Wall abutment profiles may need to be provided (by others) for fixing overpanels and sidelights.
