

CASE STUDY HOUNSLOW CIVIC CENTRE

THE PROJECT

Hounslow Civic Centre was part of a £410m redevelopment project in the heart of Hounslow which included the new council offices, a library and a cafe for Hounslow council. Bellsure were asked by Bouygues UK to provide cycle storage for this project along with accompanying bin store.

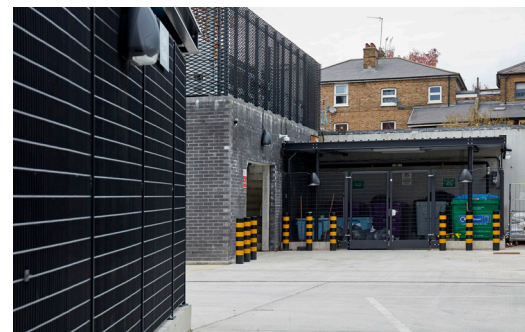

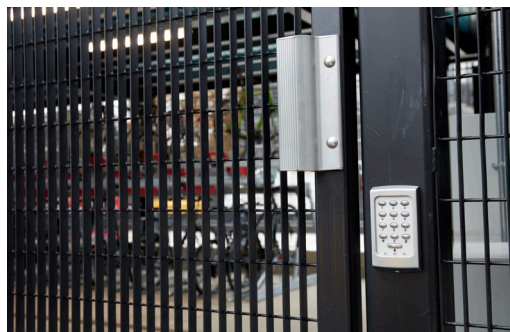

As requested by Bouygues, we provided quotes on bespoke cycle shelters and bin stores and standard shelters with gas assisted double deckers. We also supplied CAD designs and .dwg files to build into the clients BIM model. This included a CAD file that included specified materials along with our recommendations, panel details and security fixings.

THE SOLUTION

The Streetsure team secured the contract and project managed the supply of the bespoke shelters and cycle storage to suit Bouygues budget and within the timeframe allotted on this project.

For the cycle storage, we supplied our Classic double decker cycle racks and Sheffield stands. These were space planned strategically to fit as many spaces into the area as possible, and provide a greater return on investment for our client.

Our bespoke cycle shelters were the chosen option for this design-led project. The shelter was a bespoke powder-coated steel frame with a bespoke Euroclad standing seam roof. We also provided access control to ensure that staff bike's were kept safe while stored on site. This design was chosen to provide longevity and minimal maintenance to the shelter throughout the life cycle of this product.

We consult, design and build both bespoke and standard solutions for a range of projects. Supply only and supply and install packages available.

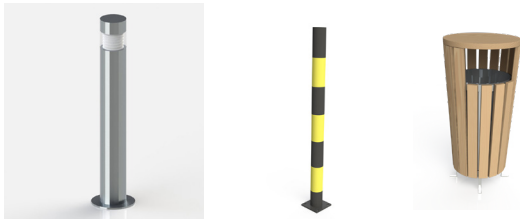

BENCHES & PLANTERS

CYCLE PARKING

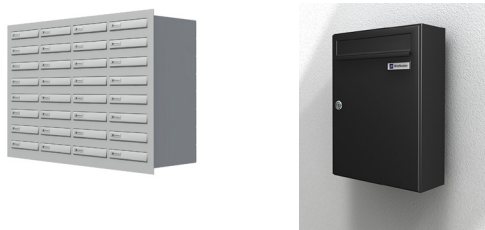

BINS & BOLLARDS

SHELTERS & ENCLOSURES

MAIL BOXES & PARCEL LOCKERS

GREEN ROOF SHELTERS

URBAN RELAY SMART LOCKERS

CAR PARK PRODUCTS

BESPOKE Our team can design bespoke solutions or provide 'off the shelf' solutions with reduced lead times

SUPPLY AND INSTALL A range of installation options to suit your needs

CAD In-house CAD design dwg files available for BIM implementation

EXPERTISE Dedicated project management and technical advice for your project
